Teodoro Vanterpool

Node.js Developer
Austin, TX · teodoro.vanterpool@example.com · (737) 555-0191 · LinkedIn · GitHub

SUMMARY

Node.js developer with 6 years building TypeScript APIs and event-driven services for logistics and payments products. Rebuilt a shipment-tracking API that now answers 2.3 million requests a day at a p95 of 95ms, and moved 11 cron scripts onto a monitored job queue. Comfortable owning a service from schema design to on-call.

EXPERIENCE

Node.js Developer — Halfmoon Freight Systems

Austin, TX · Mar 2022 – Present

- Rebuilt the shipment-tracking API in NestJS and TypeScript, serving 2.3 million requests a day and cutting p95 latency from 410ms to 95ms.
- Replaced 11 unmonitored cron scripts with BullMQ workers on Redis, dropping silently failed nightly jobs from about 6 a month to 0 over 14 months.
- Added PostgreSQL indexes and rewrote 9 slow Prisma queries found through pg_stat_statements, lowering database CPU from 78% to 41% at peak.
- Split a carrier-webhook handler into a queue consumer with idempotency keys, ending duplicate status updates that caused 300 support tickets a quarter.

Backend Developer — Quillfeather Pay

Dallas, TX · Jun 2019 – Feb 2022

- Built 24 Express endpoints for a merchant payouts product that moved $41M in its first year with no reconciliation errors.
- Wrote contract tests with Jest and Pact for 3 consumer apps, catching 8 breaking API changes before release.
- Containerized 5 Node.js services with Docker and moved them to AWS ECS, trimming hosting cost by 28% a month.

SKILLS

Languages: TypeScript, JavaScript (ES2023), SQL, Bash

Node.js: NestJS, Express, Fastify, BullMQ, Prisma, Zod

Data: PostgreSQL, Redis, MongoDB, Kafka

Ops and testing: Docker, AWS ECS and Lambda, GitHub Actions, Jest, Pact, OpenTelemetry

CERTIFICATIONS

OpenJS Node.js Application Developer (JSNAD)

EDUCATION

B.S. Software Engineering, Texas State University, 2019

Fictional example by FindAJobAI: the person, employers and numbers are invented.
